**Tabulations From a Survey of Registered Voters in California Assessing
the Job Performance of the U.S. Congress, House Speaker Nancy Pelosi
and U.S. Senators Feinstein and Boxer**

*- prepared for -
Capitol Alert*

December 2007

Introduction

This volume presents the statistical data developed from a *Field Poll* survey of California registered voters assessing the job performance of the U.S. Congress, House Speaker Nancy Pelosi and U.S. Senators Dianne Feinstein and Barbara Boxer. The survey was completed December 10-17, 2007. *The Field Poll* is an independent and non-partisan survey of public opinion in California established in 1945 by Mervin Field. Reports of *The Field Poll*, typically published 30-50 times per year, cover a wide range of political, and political topics. Many of California's leading media properties and news organizations publish and broadcast the results of each *Field Poll* report as feature or breaking news stories in their respective publications and broadcasts. All new and previous reports since 1995 are available to the public through its online archives at www.field.com/fieldpollonline. *The Field Poll* is owned and operated by Field Research Corporation, with headquarters in San Francisco, California.

The results contained in this report are based on a *Field Poll* survey completed among a representative sample of 1,283 registered voters statewide. In order to cover a wide range of issues and still minimize possible respondent fatigue, the overall sample of registered voters statewide was divided into sub-samples of 634 and 649 voters for some of the questions in this report. All interviewing was conducted during the period December 10-17, 2007 by telephone.

Sample Frame

Voters in the survey were selected randomly from a listing of California's statewide voter registration rolls. The list used by Field provides a telephone number for over 90% of the state's registered voters. These telephone numbers come from a variety of sources, including telephone numbers included by the voter on the his/her official voter registration form, as well as through cross-referencing voter names and addresses against recent telephone directories and other telephone matching services. While the telephone numbers are primarily landline telephone numbers, these phone listings also include cell phones, whenever a cell phone number is provided by the voter when registering or in other settings accessible through telephone matching services. Thus, cell phones are not systematically excluded from the sample frame. Special procedures were used in the survey when contacting voters on their cell phones to include them into the survey sample.

Data Collection

Prior to the start of data collection, professionally-trained telephone interviewers were briefed with regard to the survey's proper calling and interviewing procedures by the Study Director. This session provided both interviewers and supervisors with an overview of the study and includes a question-by-question review of all items in the survey.

Interviewers then completed all survey interviews by telephone through the computer-assisted telephone interviewing (CATI) system. CATI controls the telephone scripts read to individual respondents by displaying the appropriate questionnaire items and their valid response code alternatives in their proper sequence on computer screens at each interviewer's booth. The interviewer then reads each question aloud to the respondent from the screen and enters each respondent's pre-coded answer category through the keyboard directly to a computer disk. All answers are automatically stored in computer memory.

In order to bring hard-to-reach respondents into the survey, up to eight attempts (an initial call plus seven callbacks) were made to each telephone number selected for inclusion into the sample. Callbacks were made at different times and on different days to increase the probability of finding adults available for the interview. Where possible, appointments are made at specified dates and times to maximize convenience and cooperation rates.

Data Processing

Because CATI itself provides for the direct data entry of responses by the interviewer and does not permit ineligible or invalid data entries, the data file resulting from CATI interviewing is itself virtually error-free. Following this, a final series of data checks were performed by means of a specially designed cleaning program that scrutinizes each respondent record for internally inconsistent information. Once the data were determined to be clean and error-free, the sample was weighted to align it to known estimates of the demographic and regional characteristics of the state's registered voter population.

Guide to Reading the Tables

The following is an explanation of the detailed statistical tabulations contained in this report:

- The question or questions upon which the data are based is shown at the top of each table
- Tables are percentaged vertically with the raw percentage base appearing at the top of each column.
- The data have been weighted to known parameters of the statewide registered voter population. All percentages and frequencies reported in each table are therefore weighted tabulations.
- In instances where percentages are calculated on small bases (e.g., when the unweighted base is fewer than 100 respondents) the reader is urged to interpret the data with caution, since results are subject to relatively large levels of sampling error.
- Throughout the tables an asterisk is used to denote a value of less than 1/2 of 1%. A hyphen indicates zero value. On some tables the percentages may add to more than 100% due to multiple mentions.
- Bases of subgroups used in the tabulations may add to less than the total number of respondents due to some respondents not reporting that characteristic.

Subgroup Definitions

The following are some of the definitions applicable to some of the voter subgroups reported in this volume:

Area

Southern California: Los Angeles, Orange, Riverside, San Bernardino, San Diego, Imperial, Santa Barbara, Ventura, Kern, and San Luis Obispo counties

Northern California: all other 48 California counties

Coastal Counties: San Diego, Orange, Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Monterey, Santa Cruz, San Mateo, San Francisco, Contra Costa, Alameda, Marin, Napa, Solano, Sonoma, Santa Clara, Mendocino, Humboldt and Del Norte counties

Inland counties: all other 38 California counties

Region

Los Angeles: Los Angeles County

San Diego: San Diego County

Orange: Orange County

Other South: San Bernardino, Riverside, Imperial, Ventura, Santa Barbara, and San Luis Obispo

Central Valley: Butte, Colusa, Fresno, Glenn, Kern, Kings, Madera, Merced, Placer, Sacramento, San Joaquin, Shasta, Stanislaus, Sutter, Tehema, Tulare, Yolo, and Yuba

SF Bay Area: San Francisco, Marin, Napa, Sonoma, Solano, Contra Costa, Alameda, Santa Clara and San Mateo

Other North: Alpine, Amador, Calaveras, Del Norte, El Dorado, Humboldt, Inyo, Lake, Lassen, Mariposa, Mendocino, Monterey, Modoc, Mono, Nevada, Plumas, San Benito, Santa Cruz, Sierra, Siskiyou, Trinity, and Tuolumne

All other subgroups are based on demographic variables or are derived from questions asked in the survey.

Estimates of Sampling Error

In any survey based on a sampling, there is some sampling error introduced into the data by the process of sampling itself. When the sample has been drawn using random processes, it is possible to apply probability principles to determine the potential range of such error. While survey samples of human populations rarely, if ever, meet all of the criteria theoretically required for the application of these principles, it is customary to use them as an approximation of error that is introduced as a result of sampling. The table below shows the range of error that is associated with samples of various sizes, assuming the use of the 95% confidence level, which is customary for most public opinion surveys.

For example, if 50% of a sample of overall sample of the 1,283 registered voters in California answered “yes” to a specific question, this statistic would have a sampling error of plus or minus 2.9 percentage points at the 95% confidence level. This means that there is a 95% chance that had the entire population of registered voters statewide been interviewed using the same questionnaire and methods, the results of such a census would yield a result between 47.1% and 52.9%. The same procedure can be used to estimate the sample error ranges of any other statistic contained in this report.

<u>Approximate sample size</u>	<u>Approximate percentage distribution of replies to question</u>				
	<u>10%</u>	<u>30%</u>	<u>50%</u>	<u>70%</u>	<u>90%</u>
100	+/- 6.0	+/- 9.2	+/- 10.0	+/- 9.2	+/- 6.0
200	+/- 4.3	+/- 6.5	+/- 7.1	+/- 6.5	+/- 4.3
300	+/- 3.5	+/- 5.3	+/- 5.8	+/- 5.3	+/- 3.5
600	+/- 2.4	+/- 3.7	+/- 4.0	+/- 3.7	+/- 2.4
1000	+/- 1.9	+/- 2.9	+/- 3.2	+/- 2.9	+/- 1.9
1200	+/- 1.7	+/- 2.7	+/- 2.9	+/- 2.7	+/- 1.7

There are many other possible sources of error other than sampling variability in this and any other public opinion survey. Different results could occur because of differences in question wording, sequencing, the rigor with which sampling procedures were implemented, or through undetected errors or omissions in sampling, interviewing or data processing. The Field professionals working on this study did everything possible to minimize such errors.

Questions Asked

(ASKED OF ALL REGISTERED VOTERS)

Overall, do you approve or disapprove of the way Congress is doing its job?

(ASKED OF A RANDOM SUBSAMPLE OF VOTERS)

What about the Democrats in Congress? Do you approve or disapprove of the way Congressional Democrats are doing their job?

What about the Republicans in Congress? Do you approve or disapprove of the way Congressional Republicans are doing their job?

Do you approve or disapprove of the way Nancy Pelosi is handling her job as Speaker of the U.S. House of Representatives?

Do you approve or disapprove of the way Barbara Boxer is handling her job as U.S. Senator?

Do you approve or disapprove of the way Dianne Feinstein is handling her job as U.S. Senator?
