**Tabulations From a Survey of Likely Voters in California About Five of
the Propositions on the November Statewide Election Ballot**

*- prepared for -
Capitol Alert*

July 22, 2008

Introduction

This volume presents the statistical data developed from a *Field Poll* survey of likely voters in California about five of the propositions on the November statewide election ballot – Proposition 1 (High Speed Rail Bonds), Proposition 2 (Treatment of Farm Animals), Proposition 4 (parental Notification of Teen Abortion), Proposition 7 (renewable Energy), and Proposition 11 (Redistricting). *The Field Poll* is an independent and non-partisan survey of public opinion in California established in 1945 by Mervin Field. Reports of *The Field Poll*, typically published 30-50 times per year, cover a wide range of political, and political topics. Many of California's leading media properties and news organizations publish and broadcast the results of each *Field Poll* report as feature or breaking news stories in their respective publications and broadcasts. All new and previous reports since 1995 are available to the public through its online archives at www.field.com/fieldpollonline. *The Field Poll* is owned and operated by Field Research Corporation, with headquarters in San Francisco, California. The results contained in this report are based on a *Field Poll* survey completed among a representative sample of 672 likely voters in the November general election. In order to cover a broad range of issues and still minimize possible voter fatigue, the likely voter sample was divided into to random subsamples of 314 and 358 likely voters each on these propositions. All interviewing was conducted July 8-14, 2008 by telephone in English and Spanish.

Sample Frame

Voters in the survey were selected randomly from a listing of California's statewide voter registration rolls. The list provides a telephone number for about 90% of the state's registered voters, derived from a variety of sources, including telephone numbers included by the voter on the his/her official voter registration form, as well as through cross-referencing voter names and addresses against recent telephone directories and other telephone matching services. While the listings are primarily landline telephone numbers, they also include cell phones, whenever a cell phone number is provided by the voter when registering or in other settings accessible through telephone matching services. Thus, cell phones are not systematically excluded from the sample frame.

Data Collection

Prior to the start of data collection, professionally-trained telephone interviewers were briefed with regard to the survey's proper calling and interviewing procedures by the Study Director. This session provided both interviewers and supervisors with an overview of the study and includes a question-by-question review of all items in the survey. Interviewers then completed all survey interviews by telephone through the computer-assisted telephone interviewing (CATI) system. CATI controls the telephone scripts read to individual respondents by displaying the appropriate questionnaire items and their valid response code alternatives in their proper sequence on computer screens at each interviewer's booth. The interviewer then reads each question aloud to the respondent from the screen and enters each respondent's pre-coded answer category through the keyboard directly to a computer disk. All answers are automatically stored in computer memory.

In order to bring hard-to-reach respondents into the survey, up to six attempts (an initial call plus five callbacks) were made to each telephone number selected for inclusion into the sample. Callbacks were made at different times and on different days to increase the probability of finding adults available for the interview. Where possible, appointments are made at specified dates and times to maximize convenience and cooperation rates.

Data Processing

Because CATI itself provides for the direct data entry of responses by the interviewer and does not permit ineligible or invalid data entries, the data file resulting from CATI interviewing is itself virtually error-free.

Following this, a final series of data checks were performed by means of a specially designed cleaning program that scrutinizes each respondent record for internally inconsistent information. Once the data were determined to be clean and error-free, the sample was weighted slightly to align it to known estimates of the demographic and regional characteristics of the state's registered voter population.

Guide to Reading the Tables

The following is an explanation of the detailed statistical tabulations contained in this report:

- The question or questions upon which the data are based is shown at the top of each table
- Tables are percentaged vertically with the raw percentage base appearing at the top of each column.
- The data have been weighted to known parameters of the statewide registered voter population. All percentages and frequencies reported in each table are therefore weighted tabulations.
- In instances where percentages are calculated on small bases (e.g., when the unweighted base is fewer than 100 respondents) the reader is urged to interpret the data with caution, since results are subject to relatively large levels of sampling error.
- Throughout the tables an asterisk is used to denote a value of less than 1/2 of 1%. A hyphen indicates zero value. On some tables the percentages may add to more than 100% due to multiple mentions.
- Bases of subgroups used in the tabulations may add to less than the total number of respondents due to some respondents not reporting that characteristic.

Subgroup Definitions

The following are some of the definitions applicable to some of the voter subgroups reported in this volume:

Area

Southern California: Los Angeles, Orange, Riverside, San Bernardino, San Diego, Imperial, Santa Barbara, Ventura, Kern, and San Luis Obispo counties

Northern California: all other 48 California counties

Coastal Counties: San Diego, Orange, Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Monterey, Santa Cruz, San Mateo, San Francisco, Contra Costa, Alameda, Marin, Napa, Solano, Sonoma, Santa Clara, Mendocino, Humboldt and Del Norte counties

Inland counties: all other 38 California counties

Region

Los Angeles: Los Angeles County

San Diego/Orange: San Diego County and Orange counties

Other South: San Bernardino, Riverside, Imperial, Ventura, Santa Barbara, and San Luis Obispo

SF Bay Area: San Francisco, Marin, Napa, Sonoma, Solano, Contra Costa, Alameda, Santa Clara and San Mateo

Central Valley: Butte, Colusa, Fresno, Glenn, Kern, Kings, Madera, Merced, Placer, Sacramento, San Joaquin, Shasta, Stanislaus, Sutter, Tehema, Tulare, Yolo, and Yuba

Other North: Alpine, Amador, Calaveras, Del Norte, El Dorado, Humboldt, Inyo, Lake, Lassen, Mariposa, Mendocino, Monterey, Modoc, Mono, Nevada, Plumas, San Benito, Santa Cruz, Sierra, Siskiyou, Trinity, and Tuolumne

All other subgroups are based on demographic variables or are derived from questions asked in the survey.

Estimates of Sampling Error

In any survey based on a sampling, there is some sampling error introduced into the data by the process of sampling itself. When the sample has been drawn using random processes, it is possible to apply probability principles to determine the potential range of such error. While survey samples of human populations rarely, if ever, meet all of the criteria theoretically required for the application of these principles, it is customary to use them as an approximation of error that is introduced as a result of sampling. The table below shows the range of error that is associated with samples of various sizes, assuming the use of the 95% confidence level, which is customary for most public opinion surveys.

For example, if 50% of a sample of overall sample of 314 likely voters interviewed answered “yes” to a specific question, this statistic would have a sampling error of plus or minus 5.6 percentage points at the 95% confidence level. This means that there is a 95% chance that had the entire population of likely voters statewide been interviewed using the same questionnaire and methods, the results of such a census would yield a result between 44.4% and 5.6%. The same procedure can be used to estimate the sample error ranges of any other statistic contained in this report.

<u>Approximate sample size</u>	<u>Approximate percentage distribution of replies to question</u>				
	<u>10%</u>	<u>30%</u>	<u>50%</u>	<u>70%</u>	<u>90%</u>
100	+/- 6.0	+/- 9.2	+/- 10.0	+/- 9.2	+/- 6.0
200	+/- 4.3	+/- 6.5	+/- 7.1	+/- 6.5	+/- 4.3
320	+/- 3.4	+/- 5.1	+/- 5.6	+/- 4.1	+/- 3.4

There are many other possible sources of error other than sampling variability in this and any other public opinion survey. Different results could occur because of differences in question wording, sequencing, the rigor with which sampling procedures were implemented, or through undetected errors or omissions in sampling, interviewing or data processing. The Field professionals working on this study did everything possible to minimize such errors.

Questions Asked

(ASKED OF SUBSAMPLE A)

Have you seen, read or heard anything about Proposition One, a bond having to do with high-speed passenger trains to appear on the November statewide election ballot?

(As you know) Proposition One is the “Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century.” It creates the High Speed Rail Authority with the responsibility of the development and implementation of intercity high-speed rail service. It provides for the issuance of 9.9 billion dollars of general obligation bonds, 9 billion dollars of which would be used with federal funds for the planning and construction of a high-speed train system in California. 950 million dollars of the proceeds would be available for capital projects on other passenger rail lines to provide connectivity to the high speed train system and for capacity enhancements and safety improvements to those lines. If the election were being held today, would you vote YES or NO on Proposition One, the Safe, Reliable High-Speed Passenger Train Bond Act for the 21st Century?

Have you seen, read or heard anything about Proposition 2, about the treatment of farm animals to appear on the November statewide election ballot?

(As you know) Proposition 2 is the "Treatment of Farm Animals" initiative. It requires that enclosures or tethers confining farm animals allow the animals to fully extend their limbs or wings, lie down, stand up and turn around for a majority of every day. This includes calves raised for veal, egg-laying hens, and pregnant pigs. Exceptions would be made for transportation, rodeos, fairs and other purposes. Provides misdemeanor penalties including a fine not to exceed 1,000 dollars and/or imprisonment of up to 180 days. If the election were being held today, would you vote YES or NO on Proposition 2, the Treatment of Farm Animals initiative?

(ASKED OF SUBSAMPLE B)

Have you seen, read or heard anything about Proposition 4, an initiative having to do with parental notification of teen abortion to appear on the November statewide election ballot?

(As you know) Proposition 4 is the “Waiting Period and Parental Notification Before Termination of Minor’s Pregnancy” initiative. It amends the California constitution prohibiting abortion for minors under the age of 18 until 48 hours after a physician notifies the minor’s parent, legal guardian, or if parental abuse, an adult family member. It provides exceptions for a medical emergency or with parental waiver and permits courts to waive notice. It mandates reporting requirements and authorizes monetary damages against physicians for violations. It requires a minor's consent to abortion and permits judicial relief if a minor's consent is coerced. If the election were being held today, would you vote YES or NO on Proposition 4, the Waiting Period and Parental Notification Before Termination of Minor’s Pregnancy initiative?

Have you seen, read or heard anything about Proposition 7, an initiative to establish standards for renewable energy to appear on the November election ballot?

(As you know) Proposition 7 is the “Renewable Energy” initiative. It requires all utilities to generate 20% of their power from renewable energy sources by 2010, increasing to 40% by 2020 and 50% by 2025. It imposes penalties for non-compliance and fast tracks approval for new renewable energy plants. It also requires utilities to sign longer contracts to procure renewable energy and creates a Solar and Clean Energy Transmission Account to purchase property or rights of way for renewable energy. Fiscal impact: State administrative costs of up to 3.4 million annually for regulatory activities. If the election were being held today, would you vote YES or NO on Proposition 7, the Renewable Energy initiative?

Have you seen, read or heard anything about Proposition 11, a state constitutional amendment having to do with how election district boundary lines are drawn to appear on the November election ballot?

(As you know) Proposition 11 is the “Redistricting Constitutional Amendment.” It creates a 14-member redistricting commission responsible for drawing new district lines for State Senate, Assembly and Board of Equalization districts. It requires the State Auditor to randomly select commission members from a voter applicant poll with five members from each of the two largest political parties and four members unaffiliated with either political party. It requires nine votes to approve final district maps, and establishes standards for drawing new lines to include respecting the geographic integrity of neighborhoods and encouraging geographic compactness. If the election were being held today, would you vote YES or NO on Proposition 11, the Redistricting Constitutional Amendment?

July 2008 Field Poll

Table 97

Q.27 (As you know) Proposition 2 is the "Treatment of Farm Animals" initiative. It requires that enclosures or tethers confining farm animals allow the animals to fully extend their limbs or wings, lie down, stand up and turn around for a majority of every day. This includes calves raised for veal, egg-laying hens, and pregnant pigs. Exceptions would be made for transportation, rodeos, fairs and other purposes. Provides misdemeanor penalties including a fine not to exceed 1,000 dollars and/or imprisonment

Q.29 (As you know) Proposition 4 is the "Waiting Period and Parental Notification Before Termination of Minor's Pregnancy" initiative. It amends the California constitution prohibiting abortion for minors under the age of 18 until 48 hours after a physician notifies the minor's parent, legal guardian, or if parental abuse, an adult family member. It provides exceptions for a medical emergency or with parental waiver and permits courts to waive notice. It mandates reporting requirements and authorizes monetary damages

July 2008 Field Poll

Table 111

Q.31 (As you know) Proposition 7 is the "Renewable Energy" initiative. It requires all utilities to generate 20% of their power from renewable energy sources by 2010, increasing to 40% by 2020 and 50% by 2025. It imposes penalties for non-compliance and fast tracks approval for new renewable energy plants. It also requires utilities to sign longer contracts to procure renewable energy and creates a Solar and Clean Energy Transmission Account to purchase property or rights of way for renewable energy. Fiscal impact:
