Tabulations From a Survey of California Likely Voters About Voting Preferences on Prop. 8 (Same-sex Marriage Ban), Prop. 2 (Farm Animal Confinement), Prop. 7 (Renewable Energy Generation) and Prop. 11 (Redistricting)

*- prepared for -
Capitol Alert*

October 31, 2008

Introduction

This volume presents the statistical data developed from a *Field Poll* survey of likely voters in California about their voting preferences on Proposition 8, the same-sex marriage ban, Prop. 2 about farm animal confinement, Prop. 7 on renewal energy generation, and Prop. 11 about redistricting. *The Field Poll* is an independent and non-partisan survey of public opinion in California established in 1945 by Mervin Field. Reports of *The Field Poll*, typically published 30-50 times per year, cover a wide range of political, and political topics. Many of California's leading media properties and news organizations publish and broadcast the results of each *Field Poll* report as feature or breaking news stories in their respective publications and broadcasts. All new and previous reports since 1995 are available to the public through its online archives at www.field.com/fieldpollonline. *The Field Poll* is owned and operated by Field Research Corporation, with headquarters in San Francisco, California.

The results contained in this report are based on a *Field Poll* survey completed among a representative sample of 966 likely voters in California. All interviewing was conducted October 18-28, 2008 by telephone in English and Spanish. In order to cover a broad range of issues and still minimize possible respondent fatigue, the overall sample of voters was divided in two random subsamples of voters on some of the questions included in this report.

Sampling

Voters in the survey were selected randomly from a listing of California's statewide voter registration rolls. The list provides a telephone number for about 90% of the state's registered voters, derived from a variety of sources, including telephone numbers included by the voter on the his/her official voter registration form, as well as through cross-referencing voter names and addresses against recent telephone directories and other telephone matching services. While the listings are primarily landline telephone numbers, they also include cell phones, whenever a cell phone number is provided by the voter when registering or in other settings accessible through telephone matching services. Thus, interviews were conducted on either the voter's landline or cell phone, depending on the source of the telephone listing and the voter's preference.

Data Collection

Prior to the start of data collection, professionally-trained telephone interviewers were briefed with regard to the survey's proper calling and interviewing procedures by the Study Director. This session provided both interviewers and supervisors with an overview of the study and includes a question-by-question review of all items in the survey. Interviewers then completed all survey interviews by telephone through the computer-assisted telephone interviewing (CATI) system. CATI controls the telephone scripts read to individual respondents by displaying the appropriate questionnaire items and their valid response code alternatives in their proper sequence on computer screens at each interviewer's booth. The interviewer then reads each question aloud to the respondent from the screen and enters each respondent's pre-coded answer category through the keyboard directly to a computer disk. All answers are automatically stored in computer memory.

In order to bring hard-to-reach respondents into the survey, up to six attempts (an initial call plus five callbacks) were made to each telephone number selected for inclusion into the sample. Callbacks were made at different times and on different days to increase the probability of finding adults available for the interview. Where possible, appointments are made at specified dates and times to maximize convenience and cooperation rates.

Data Processing

Because CATI itself provides for the direct data entry of responses by the interviewer and does not permit ineligible or invalid data entries, the data file resulting from CATI interviewing is itself virtually error-free.

Following this, a final series of data checks were performed by means of a specially designed cleaning program that scrutinizes each respondent record for internally inconsistent information. Once the data were determined to be clean and error-free, the sample was weighted slightly to align it to known estimates of the demographic and regional characteristics of the state's registered voter population. Please note that the bases shown throughout the tabulations in this report are weighted bases and differ slightly from the actual number of respondents interviewed within each subgroup.

Guide to Reading the Tables

The following is an explanation of the detailed statistical tabulations contained in this report:

- The question or questions upon which the data are based is shown at the top of each table
- Tables are percentaged vertically with the raw percentage base appearing at the top of each column.
- The data have been weighted to known parameters of the statewide registered voter population. All percentages and frequencies reported in each table are therefore weighted tabulations.
- In instances where percentages are calculated on small bases (e.g., when the unweighted base is fewer than 100 respondents) the reader is urged to interpret the data with caution, since results are subject to relatively large levels of sampling error.
- Throughout the tables an asterisk is used to denote a value of less than 1/2 of 1%. A hyphen indicates zero value. On some tables the percentages may add to more than 100% due to multiple mentions.
- Bases of subgroups used in the tabulations may add to less than the total number of respondents due to some respondents not reporting that characteristic.

Subgroup Definitions

The following are some of the definitions applicable to some of the voter subgroups reported in this volume:

Area

Southern California: Los Angeles, Orange, Riverside, San Bernardino, San Diego, Imperial, Santa Barbara, Ventura, Kern, and San Luis Obispo counties

Northern California: all other 48 California counties

Coastal Counties: San Diego, Orange, Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Monterey, Santa Cruz, San Mateo, San Francisco, Contra Costa, Alameda, Marin, Napa, Solano, Sonoma, Santa Clara, Mendocino, Humboldt and Del Norte counties

Inland counties: all other 38 California counties

Region

Los Angeles: Los Angeles County

San Diego/Orange: San Diego County and Orange counties

Other South: San Bernardino, Riverside, Imperial, Ventura, Santa Barbara, and San Luis Obispo

SF Bay Area: San Francisco, Marin, Napa, Sonoma, Solano, Contra Costa, Alameda, Santa Clara, San Mateo

Central Valley: Butte, Colusa, Fresno, Glenn, Kern, Kings, Madera, Merced, Placer, Sacramento, San Joaquin, Shasta, Stanislaus, Sutter, Tehema, Tulare, Yolo, and Yuba

Other North: Alpine, Amador, Calaveras, Del Norte, El Dorado, Humboldt, Inyo, Lake, Lassen, Mariposa, Mendocino, Monterey, Modoc, Mono, Nevada, Plumas, San Benito, Santa Cruz, Sierra, Siskiyou, Trinity, and Tuolumne

Estimates of Sampling Error

In any survey based on a sampling, there is some sampling error introduced into the data by the process of sampling itself. When the sample has been drawn using random processes, it is possible to apply probability principles to determine the potential range of such error. While survey samples of human populations rarely, if ever, meet all of the criteria theoretically required for the application of these principles, it is customary to use them as an approximation of error that is introduced as a result of sampling. The table below shows the range of error that is associated with samples of various sizes, assuming the use of the 95% confidence level, which is customary for most public opinion surveys.

For example, if 50% of a sample of overall sample of 966 likely voters answered “yes” to a specific question, this statistic would have a sampling error of plus or minus 3.3 percentage points at the 95% confidence level. This means that there is a 95% chance that had the overall population of registered voters statewide been interviewed using the same questionnaire and methods, the results of such a census would yield a result between 46.7% and 53.3%. The same procedure can be used to estimate the sample error ranges of any other statistic contained in this report. The sampling error for results based on subgroups of the overall population are approximately +/- 5.0 percentage points.

<u>Approximate sample size</u>	<u>Approximate percentage distribution of replies to question</u>				
	<u>10%</u>	<u>30%</u>	<u>50%</u>	<u>70%</u>	<u>90%</u>
100	+/- 6.0	+/- 9.2	+/- 10.0	+/- 9.2	+/- 6.0
200	+/- 4.3	+/- 6.5	+/- 7.1	+/- 6.5	+/- 4.3
400	+/- 3.0	+/- 4.6	+/- 5.0	+/- 4.6	+/- 3.0
500	+/- 2.7	+/- 4.1	+/- 4.5	+/- 4.1	+/- 2.7
800	+/- 2.5	+/- 3.8	+/- 4.1	+/- 3.8	+/- 2.5
966	+/- 2.0	+/- 3.0	+/- 3.3	+/- 3.0	+/- 2.0

There are many other possible sources of error other than sampling variability in this and any other public opinion survey. Different results could occur because of differences in question wording, sequencing, the rigor with which sampling procedures were implemented, or through undetected errors or omissions in sampling, interviewing or data processing. However, the overall design and execution of the survey minimized the potential for these other sources of error.

Questions Asked

ASKED OF ALL VOTERS

Have you seen, read or heard anything about Proposition 8, the state constitutional amendment having to do with same sex marriages on the November statewide election ballot?

(As you know) Proposition 8 is the initiative to "Eliminate the Right of Same-Sex Couples to Marry" constitutional amendment. It changes the California Constitution to eliminate the right of same-sex couples to marry and provides that only marriage between a man and a woman is valid or recognized in California. Fiscal impact: Potential revenue loss over the next few years, mainly to sales taxes, totaling several tens of millions of dollars to state and local government. (IF NOT ALREADY VOTED: If the election were being held today, would you vote YES or NO on Prop. 8?) (IF ALREADY VOTED: Did you vote YES or NO on Prop. 8?)

ASKED OF A RANDOM SUBSAMPLE OF VOTERS

I am going to read some statements that have been made about Proposition 8 and for each, please tell me whether you agree or disagree. (ITEMS READ IN RANDOM ORDER, ASKING:) Do you agree or disagree? (SEE RELEASE FOR ITEMS READ)

Have you seen, read or heard anything about Proposition 2, about standards for confining farm animals on the November statewide election ballot?

(As you know) Proposition 2 is the "Standards for Confining Farm Animals" initiative. It requires that certain farm animals be allowed for the majority of every day to fully extend their limbs or wings, lie down, stand up and turn around. Limited exceptions apply. Fiscal impact: Potential unknown decreases in tax revenues from farm businesses in the range of several million dollars annually. (IF NOT ALREADY VOTED: If the election were being held today, would you vote YES or NO on Prop. 2?) (IF ALREADY VOTED: Did you vote YES or NO on Prop. 2?)

Have you seen, read or heard anything about Proposition 7, an initiative to establish standards for renewable energy on the November election ballot?

(As you know) Proposition 7 is the "Renewable Energy Generation" initiative. It requires all utilities to generate 20% of their electricity from renewable energy by 2010, increasing to 40% by 2020 and 50% by 2025. Fiscal impact: Increased state administrative costs of up to \$3.4 million annually paid by fees. (IF NOT ALREADY VOTED: If the election were being held today, would you vote YES or NO on Prop. 7?) (IF ALREADY VOTED: Did you vote YES or NO on Prop. 7?)

Have you seen, read or heard anything about Proposition 11, a state constitutional amendment having to do with how election district boundary lines are drawn on the November election ballot?

(As you know) Proposition 11 is the "Redistricting Initiative Constitutional Amendment." It changes authority for establishing office boundaries from elected representatives to a commission and establishes a multi-level process to select commissioners from the registered voter pool. The commission would be comprised of Democrats, Republicans and representatives of neither party. (IF NOT ALREADY VOTED: If the election were being held today, would you vote YES or NO on Prop. 11?) (IF ALREADY VOTED: Did you vote YES or NO on Prop. 11?)

Table 46

Q.13 I am going to read some statements that have been made about Proposition 8...

(a.) Prop. 8 reverses the flawed legal reasoning of activist judges who overturned the state's previous voter-approved law defining marriage as between a man and a woman.

Do you agree or disagree?

October 2008 Field Poll

Table 82

Q.16 (As you know) Proposition 7 is the "Renewable Energy Generation" initiative. It requires all utilities to generate 20% of their electricity from renewable energy by 2010, increasing to 40% by 2020 and 50% by 2025.

Fiscal impact: Increased state administrative costs of up to \$3.4 million annually paid by fees.

(Would/Did) you vote YES or NO on Prop. 7?

Base: Likely voters (Form A)

October 2008 Field Poll

Table 94

Q.20 (As you know) Proposition 2 is the "Standards for Confining Farm Animals" initiative. It requires that certain farm animals be allowed for the majority of every day to fully extend their limbs or wings, lie down, stand up and turn around.

Limited exceptions apply. Fiscal impact: Potential unknown decreases in tax revenues from farm businesses in the range of several million dollars annually.

(Would/Did) you vote YES or NO on Prop. 2?
