Tabulations From a Survey of California Registered Voters about Undocumented Immigrants and Immigration Reform

*- prepared for the -
Capitol Alert and the Sacramento Bee*

February 22, 2013

Introduction

This volume presents the statistical data developed from a *Field Poll* survey of registered voters in California about undocumented immigrants and immigration reform. The survey was conducted by *The Field Poll* among a representative sample of 834 registered voters in California conducted by telephone in English and Spanish February 5-17, 2011. In order to cover a broad range of issues and still minimize respondent fatigue, some of the questions in this report were asked of a random subsample of 415 voters.

Sampling

The sample was developed from telephone listings of individual voters selected randomly from a listing of statewide voter registration rolls. Once a voter's name and telephone had been selected interviews are attempted only with the specified voter. Interviews can be conducted on either the voter's landline or cell phone, depending on the source of the telephone listing from the voter file and the preference of the voter.

Prior to the start of data collection, professionally-trained telephone interviewers were briefed with regard to the survey's proper calling and interviewing procedures by the Study Director. This session provided both interviewers and supervisors with an overview of the study and includes a question-by-question review of all items in the survey. Interviewers then completed survey interviews by telephone through the computer-assisted telephone interviewing (CATI) system. CATI controls the telephone scripts read to individual respondents by displaying the appropriate questionnaire items and their valid response code alternatives in their proper sequence on computer screens at each interviewer's booth. The interviewer then reads each question aloud to the respondent from the screen and enters each respondent's pre-coded answer category through the keyboard directly to a computer disk. All answers are automatically stored in computer memory.

In order to bring hard-to-reach respondents into the survey, up to six attempts (an initial call plus five callbacks) were made to each telephone number selected for inclusion into the sample. Callbacks were made at different times and on different days to increase the probability of finding voters available for the interview. Where possible, appointments are made at specified dates and times to maximize convenience and cooperation rates.

Data Processing

The data file resulting from CATI interviewing is itself virtually error-free, but is subject to a final series of data checks by a specially designed cleaning program that scrutinizes each respondent record for internally inconsistent information. Once the data were determined to be clean and error-free, the overall sample was weighted to align it to its proper statewide proportions by demographic characteristics of the state's registered voter population.

Guide to Reading the Tables

The following is an explanation of the detailed statistical tabulations contained in this report:

- The question or questions upon which the data are based is shown at the top of each table
- Tables are percentaged vertically with the raw percentage base appearing at the top of each column.
- The data have been weighted to known parameters of the statewide registered voter population. All percentages and frequencies reported in each table are therefore weighted tabulations.
- In instances where percentages are calculated on small bases (e.g., when the base is fewer than 100 respondents) the reader is urged to interpret the data with caution, since results are subject to larger levels of sampling error.
- Throughout the tables an asterisk is used to denote a value of less than 1/2 of 1%. A hyphen indicates zero value. On some tables the percentages may add to more than 100% due to multiple mentions.
- Bases of subgroups used in the tabulations may add to less than the total number of respondents due to some respondents not reporting that characteristic.

Subgroup Definitions

The following are some of the definitions applicable to some of the voter subgroups reported in this volume:

Southern California:	Los Angeles, Orange, Riverside, San Bernardino, San Diego, Imperial, Santa Barbara, Ventura, Kern, and San Luis Obispo counties
Northern California:	all other 48 California counties
Coastal Counties:	San Diego, Orange, Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Monterey, Santa Cruz, San Mateo, San Francisco, Contra Costa, Alameda, Marin, Napa, Solano, Sonoma, Santa Clara, Mendocino, Humboldt and Del Norte counties
Inland counties:	all other 38 California counties
Los Angeles:	Los Angeles County
San Diego/Orange:	San Diego County and Orange counties
Other South:	San Bernardino, Riverside, Imperial, Ventura, Santa Barbara, and San Luis Obispo
SF Bay Area:	San Francisco, Marin, Napa, Sonoma, Solano, Contra Costa, Alameda, Santa Clara, San Mateo
Central Valley:	Butte, Colusa, Fresno, Glenn, Kern, Kings, Madera, Merced, Placer, Sacramento, San Joaquin, Shasta, Stanislaus, Sutter, Tehama, Tulare, Yolo, and Yuba
Other North:	Alpine, Amador, Calaveras, Del Norte, El Dorado, Humboldt, Inyo, Lake, Lassen, Mariposa, Mendocino, Monterey, Modoc, Mono, Nevada, Plumas, San Benito, Santa Cruz, Sierra, Siskiyou, Trinity, and Tuolumne

Estimates of Sampling Error

In any survey based on a sampling, there is some sampling error introduced into the data by the process of sampling itself. When the sample has been drawn using random processes, it is possible to apply probability principles to determine the potential range of such error. While survey samples of human populations rarely, if ever, meet all of the criteria theoretically required for the application of these principles, it is customary to use them as an approximation of error that is introduced as a result of sampling. The table below shows the range of error that is associated with samples of various sizes, assuming the use of the 95% confidence level, which is customary for most public opinion surveys. For example, if 50% of the overall sample of 834 registered voters answered “yes” to a specific question, this statistic would have a sampling error of plus or minus 3.5 percentage points at the 95% confidence level. This means that there is a 95% chance that had the overall population of registered voters statewide been interviewed using the same questionnaire and methods, the results of such a census would yield a result between 46.5% and 53.5%. The same procedure can be used to estimate the sample error ranges of any other statistic contained in this report.

Approximate sample size	<u>Approximate percentage distribution of replies to question</u>				
	<u>10%</u>	<u>30%</u>	<u>50%</u>	<u>70%</u>	<u>90%</u>
100	+/- 6.0	+/- 9.2	+/- 10.0	+/- 9.2	+/- 6.0
300	+/- 3.5	+/- 5.3	+/- 5.8	+/- 5.3	+/- 3.5
400	+/- 3.0	+/- 4.6	+/- 5.0	+/- 4.6	+/- 3.0
800	+/- 2.1	+/- 3.2	+/- 3.5	+/- 3.2	+/- 2.1

There are many other possible sources of error other than sampling variability in this and any other public opinion survey. The overall design and execution of the survey minimized the potential for these other sources of error.

Questions Asked

I am going to read some proposals that have been made relating to the illegal immigration situation, and for each please tell me whether you favor or oppose this policy. **(ITEMS READ IN RANDOM ORDER)** Do you favor or oppose this policy?

Increase the number of federal border agents patrolling the U.S.-Mexico border*

Impose stiff penalties on employers who hire illegal immigrants*

Create a program that would allow illegal immigrants who have been living in the U.S. for a number of years an opportunity to stay in this country and apply for citizenship if they have a job, learned English and paid back taxes*

Build more fences along major sections of the U.S.-Mexico border*

Continue the policy of having federal immigration agents round up, detain and deport immigrants found to be living here illegally*

Create temporary worker programs for illegal immigrants that would legalize their status and allow them to work in this country*

Significantly increase the number of visas issued to immigrants who are engineers or hold other advanced degrees*

Please tell me whether you agree or disagree with the following statements about illegal or undocumented workers currently living in California. **(ITEMS READ IN RANDOM ORDER)** Do you agree or disagree that they should be allowed to (ITEM)?

get California driver's licenses

pay the same amount to attend California's public universities as the state's legal residents

** Asked of a random subsample of 419 registered voters.*
